PRELUDE TO PROJECT CALENDER

1. The Project is divided into three Modules :
    a. Algorithms Module
    b. GUI Module
    c. Debugging and Final Testing Module
2. The Team was not divided into sub-teams to act on these three parts separately as each one of them wanted to participate and experience each Module.
3. So, each module is divided across all the 7 Team Members uniformly

PROJECT TIMELINE :

a. Algorithms Module :
   - Actual Conceptualisation of this module started on 01st October 2011
   - First round of functions were distributed and source codes collected back by 17th Oct 2011, except a single default member.
   - Second round of functions were distributed and is expected to be submitted by 20th Oct 2011
   - With this, Algorithms module will be over.

b. GUI Module :
   - Since, the Team members are not yet familiar with GUI, they were given time so as to familiarize themselves with EzWindows.
   - The Upcoming task of building the user interface is expected to be divided by 21st Oct 2011.
   - The GUI module will be acted upon mostly during the Diwali vacation and will be submitted by 1st Nov 2011
   - From 1st to 3rd Nov 2011, Integration of the two modules will take place.

c. Debugging and Testing Module :
   - We are expecting the final non-tested project to be ready by 03rd Nov 2011.
   - Then we plan a suitable method to test the Program and subsequently debug the errors that crop up thereon.
   - We have planned to submit the Project by 07th November 2011.
